

DRIP FOUNDATION PTY LTD

Drip Foundation Pty Ltd. (DRIP) is an Australian fintech company with a U.S subsidiary (Drip Financial, Inc.). The company competes in three key sectors: stablecoins, digital wealth management and payment processing. DRIP's eponymous digital currency (DRIP) is the first asset-backed digital currency for which users may choose their own assets.

DRIP believes in a future where income and investment are the same thing. We believe that if you receive any payment,, that new income should automatically go to work for you through a portfolio of your chosen assets, not simply waste away like cash.

Position Title:

Software Development Intern

Description of Role

- DRIP is seeking a number of interns with previous JavaScript, Python, or Ethereum experience to work alongside our core development team on advancing the DRIP technology
- Learn about blockchain, financial services, web development, server API creation, document database, cloud computing, quality assurance, DevOps, security, and many more
- Work on one or more of the areas below depending on experience and interest of applicant:
 - Develop production system monitoring and error notification tools
 - Automate server side processes for day to day operations and system maintenance
 - Research 3rd party services and build proof of concept integration
 - Build unit and regression tests for our Ethereum Solidity smart contracts
 - Test and enhance our user interface on multiple web, mobile, and wallet platforms
 - Develop reusable React utility modules to be used within our overall framework
 - Adapt our API to be used by multiple language and development environments
 - Create tools to process, manage, summarize, and report data in our databases
 - Learn NEO, EOS, or other platforms and write smart contracts with same functionality
 - Enhance security by attempting to hack into our network as an outsider

Qualifications

- College degree in technology fields (or seniors graduating in 2019)
- Previous experience with significant coding effort in either JavaScript or Python
- Knowledge in at least one of the relevant areas mentioned above
- Self-starter and fast learner who can get up to speed quickly without much hand holding
- Keen on technology and innovation, as well as applying them to solve practical problems
- Track record that demonstrates exception persistence, resourcefulness and leadership
- Strong analytical, critical thinking, communication and interpersonal skills
- Proven ability to self-motivate, hardworking and enthusiastic

Language

- Ability to communicate in English verbally
